Order from OTS or SLA \$1.60 62-14560

Trans. of Geokhimiya (USSR) 1956, no. 2, p. 68-73.

DESCRIPTORS: *Boron, Exploration, *Well logging,
Rock, Thermal neutrons, Neutron capture,
Geophysical prospecting.

The purpose of our research was the study of the
behaviors of the curves of neutron logging in rocks
which contain elements with an abnormally large
cross-section of the capture of thermal neutrons; our
aim was the determination of the possibility of arrang-
ing the logging of these elements. We explored the
possibility of the determination of the presence of

Trans. from [Geokhimiya] (USSR) 1957, no. 1.

DESCRIPTORS: *Tin, *Geochemistry, Granite,
Chemical analysis, Age, Lattices, Centrifuges,
Mica, Ores, Deposits.

Research indicates that the granitic massifs that are
not mineralized with the tin do not differ essentially
from the "tin bearing" granites either in the age or in
the mineralogical composition. The tin penetrates
isomorphically into the biotite lattice rather than
forms an independent mineral cassiterite scattered
